

## **Datanomix CloudOps Engineer**

As a CloudOps Engineer, you will work alongside our UX and Data Services teams to:

- Design and deploy scalable, reliable, and resilient cloud clusters
- Help build and maintain system monitoring, metric collection and reporting systems
- Influence architectural decisions related to cloud infrastructure including security, scalability, and performance.
- Take ownership of best cloud practices and related documentation.

### **Education & Experience Requirements:**

- 3+ years of software development experience in C/C++, Python or Java
- BA/BS in Computer Science or another technical discipline
- Experience with containerization technologies such as Docker, Kubernetes, or Terraform
- Experience with Roles Based Access Control (RBAC) in cloud environments such as AWS, Azure or Google Cloud.
- Experience with cloud architecture patterns and message brokers such as Kafka or RabbitMQ

### **The ideal candidate will also have:**

- Knowledge of REST, RPC and web services
- Experience with source control such as Git
- Experience with industry standard debugging and troubleshooting techniques
- Enjoys working in teams
- Enjoys learning new technologies

Preferred education level: Bachelor's degree

Job/Employment Type: Full-time  
Location: Nashua, NH (Non-Remote)
