

ENGINEERING

Backend Software Engineer

Nashua, NH – Onsite – Full Time

Who We Are

Datanomix is the leader in real-time automated production monitoring for industrial manufacturers. Datanomix was founded in 2017 to help precision manufacturers optimize their production performance by providing out-of-the-box reports and workflows with **No Operator Input™** required. Based in New Hampshire, our core products include our flagship Production Monitoring system, along with Digital GEMBA Boards, and Condition Detection systems. We are proud to work with top-tier [partners](#) to deliver best-in-breed solutions to our [customers](#).

We're a rising start-up that is delighting industrial manufacturing customers with our turnkey Production Monitoring platform. Our customers are loyal, hard-working, and effusive about the impact of our product. We are led by start-up veterans, and have an affinity for gritty, entrepreneurial team members.

Role Overview:

Datanomix is seeking a Backend Software Engineer to contribute to expanding its industry-leading analytics platform. Responsibilities Include:

- Develop and maintain the core services, processes and queries used as part of our industry-leading analytics platform.
- Implement new queries and API's to surface analytics and insights
- Scale the backend services and infrastructure based on customer needs.
- Integrate and test with a variety of mobile/desktop platforms to ensure performance and functionality.

Requirements

You must have 3+ years of experience building and shipping products using most or all of the following:

- Python, GoLang or equivalent programming language

- ElasticSearch, MongoDB, Cassandra
- Docker/Kubernetes
- RBAC and Cloud Microservices (AWS, Azure or Google Cloud)
- Git/GitHub

Education Level

- BA/BS in Computer Science or another technical discipline
- All candidates must be authorized to work in the USA
