

Pair Your ERP Data with Real-Time Production Intelligence

MODERN MANUFACTURING TECHNOLOGY—CONNECTED

Gain complete visibility and control over performance, delivery, and profitability with the combined power of Datanomix + Fulcrum.

Seamless Data Flow

Job plans, cycle times, part counts, and delivery targets sync from Fulcrum directly into Datanomix. No middleware or manual entry required.

Live Benchmarking

Datanomix compares actual performance to Fulcrum's planned expectations, showing what's on time and what needs attention now.

Smarter Decision-Making

Teams know exactly when jobs are slipping and how to respond. Easily Split operations, schedule shifts, approve overtime, and keep delivery promises on track.

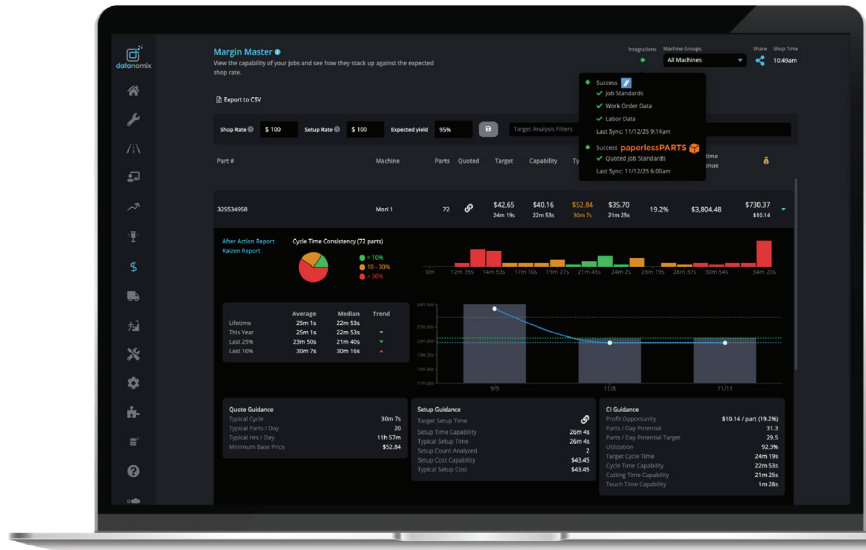

Increased Throughput Without More Machines

Why buy capacity when you can improve efficiency? As OMW's leadership puts it, "Every 4% gain in OEE saves us \$1 million in equipment we don't need to buy."

MARGIN MASTER: "ARE WE MEETING STANDARD?"

"With Fulcrum and Datanomix, we're able to make better decisions. For the first time, we have real-time insight into our operations. And we're just scratching the surface."

Michael Langston, President & COO
OMW Corporation | California

Unlock ERP Insights

ERP Insights from Datanomix bridges the gap between planning and production by combining your ERP job plans, labor targets, and due dates with real-time machine performance.

- Real-time job tracking from planning to completion
- A single source of truth across ERP and production
- Proactive decisions powered by live data
- On-time delivery tracking everyone can own
